## Haiti Disaster Relief.

PROTECTING DOCTORS AND MEDICAL STAFF FROM WATER-BORNE ILLNESS IN HAITI.

**WORLD  
WATER**  
RELIEF PROJECT™

## Mission.

More than a week after a catastrophic earthquake devastated the Port-au-Prince region in Haiti, hundreds of thousands of injured people are still left without proper medical attention.

Sovereign Earth is sponsoring a team of twenty-four doctors, surgeons, and EMTs who are scheduled to arrive in Haiti on the 22<sup>nd</sup> of January where they will be delivered to the city of Hinche via United Nations military transport. They will be equipped with Sovereign Earth portable, state-of-the-art advanced water filtration units, keeping the team hydrated and safe from water-borne contaminants during their stay at the medical compound. This team of lifesavers will set to work for ten days, volunteering their medical expertise to an overwhelming demand. We at Sovereign Earth are eager to provide this technological assistance to Haiti Endowment Fund team of volunteers.
